

DKBINNOVATIVE CASE STUDY

Partnership with a Foundation for Growth

Our Client, a dynamic, fast-growth oil and gas company based in Irving, TX. As a growing company they were in immediate need of a reliable, highly scalable infrastructure with the right blend of cloud services and on-premise network, phone, and telepresence systems.

The Director of Information Technology, is a valued partner of DKBinnovative. He was in need of a knowledgeable IT team for the company's new needs - a colleague recommended DKBinnovative for his very specific requirements.

THE FOUNDATION FOR GAST GROWTH

Their company was facing several issues prior to our entrance, some of which included:

- Need for experienced IT team in the oil and gas industry
 - Need for enterprise-level infrastructure, cabling & wiring build-out, reliable voice communications, and fast-turnaround cloud services
 - Need for a high-bandwidth, redundant internet connectivity Need for remote connectivity to their new Midland and Wyoming offices

Instant Resolution!

Our solution for our client involved the implementation of several new technologies and ongoing services. This included growing them from 5 users to the current 130 user-base. These amenities comprised of:

- Microsoft Office 365
- Cisco Meraki Network Security Appliances, Switches, and Wireless Infrastructure
- Dual WAN w/ redundant VPN at headquarters
- Fonality PBX - reliable, feature rich phone systems for multiple locations
- Managed IT Services
- Cloud Services (Active Directory & Backups)
- Clary Icon Video Conferencing implementation & management
- Ongoing monitoring and management to remediate issues before they impact staff and providers

“We use DKBinnovative for their network resources, they’re great with that. One of the greatest benefits of working with DKBinnovative is that I can call them up with a need, and they’ll make a good recommendation - they look out for us all the way around DKBinnovative adds intangible value with their professional vCIO consulting,” explains The Director of Information Technology.
